SUMMARY

Senior DevOps and Site Reliability Engineer with 6+ years of hands-on experience across multi-cloud environments (AWS, Azure, OVH) and hybrid Kubernetes platforms (EKS, Rancher). Brings end-to-end ownership across CI/CD automation, security and compliance (Wazuh, Trivy, WAF, Qualys, Teleport), Infrastructure as Code, cost optimisation, and production incident resolution – with a track record of independently diagnosing and resolving critical failures in distributed systems. Delivered across enterprise BI, search-as-a-service, social care, and healthcare verticals as both a full-time engineer and independent contractor; equally effective embedded in existing teams or leading infrastructure initiatives from the ground up.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (EC2, S3, AMI, ALB/ELB, EKS, Aurora, SSM, CloudWatch, SNS, Route53), Azure, OVH Cloud, Terraform, Ansible, Packer, Cloudflare, F5

Container & Orchestration: Kubernetes, AWS EKS, Rancher, Docker

CI/CD & DevOps: GitLab CI/CD, Jenkins, Chef, Git

Monitoring & Observability: Prometheus, VictoriaMetrics, Grafana, Nagios, ELK Stack, Splunk, SumoLogic

Security & Access: Wazuh, Trivy, WAF, Teleport, JumpCloud, Qualys, AWS PatchManager, Sectigo, CIS Benchmarks

Databases & Messaging: PostgreSQL, MySQL, SQL Server (MSSQL), MongoDB, Atlas, Redshift, Redis, Kafka, Zookeeper, Apache Solr, Metabase

Languages: Python, Shell/Bash, YAML, Ruby, Java

EXPERIENCE

Senior DevOps Engineer (Freelance Contract)

Apr 2026 – Present

Confidential – Search-as-a-Service Platform Client

Remote

- Managed hybrid Kubernetes infrastructure across OVH unmanaged K8s (Rancher-orchestrated) and AWS EKS spanning QA, UAT, and production; owned load balancer provisioning, control plane operations, and cluster scaling
- Conducted full Kubernetes workload audit; resolved stuck deployments, eliminated stale resource backlog, and documented end-to-end GitLab CI/CD pipeline from source commit through Docker image build, registry push, to production rollout
- Led root-cause analysis and resolution of two critical production incidents – a persistent data pipeline backlog traced to resource contention in the processing layer, and a CDN stale-content issue resolved through coordinated build correction and Cloudflare cache invalidation
- Drove 10x reduction in load balancer infrastructure cost by evaluating and proposing open-source alternatives (Nginx, Traefik, HAProxy) over managed cloud LB
- Deployed cluster monitoring for distributed message queues (Kafka, Zookeeper); triaged false-positive production alerts across OVH K8s and AWS EKS using Prometheus and VictoriaMetrics
- Administered Teleport privileged access management and resolved RBAC misconfiguration across production server estate; enforced identity and security policies via JumpCloud
- Managed enterprise SSL compliance certificate lifecycle across multi-server fleet; executed Business Continuity Planning (BCP) activities including AuroraDB baseline capture, DR runbook authoring, and failover node validation
- Administered MySQL, Redis, and Metabase for the platform's operational stack; managed database access controls, configuration tuning, and parameter snapshots to support BCP and failover readiness

Freelance DevOps Engineer

Nov 2025 – Apr 2026

Multiple Clients

Remote

- Social Care Technology Platform (Azure):* Deployed Wazuh SIEM across Azure VM and Kubernetes clusters; integrated Trivy for container scanning; configured WAF and reverse proxy (Nginx, HAProxy, Traefik) for secure ingress; administered PostgreSQL and MSSQL databases including access management and configuration control; designed DR plan and executed cloud cost optimisation across Azure compute and networking
- Healthcare & Insurance Domain Client:* Embedded with existing engineering team to establish DevOps practices and automate deployment pipelines, reducing operational overhead in customer-facing workflows

Career Break

Aug 2025 – Oct 2025

Parental & Family Responsibilities

Senior DevOps Engineer

Infor India Pvt Ltd (Acquired by Koch Industries)

Jan 2022 – Jul 2025

Ahmedabad, Gujarat

- Architected and maintained CI/CD pipelines for a large-scale BI and Data Warehouse platform, automating environment rehydration, release deployments, and DB migrations across dev, staging, and production
- Led end-to-end migration from Jenkins to GitLab CI/CD, Rapid7 to Qualys, and Datadog to SumoLogic, eliminating 3 legacy platform toolchains and reducing MTTR by 40%
- Built automated vulnerability scanning and remediation pipeline using Qualys, AWS SSM Patch Manager, and GitLab CI/CD; achieved 75% reduction in open critical CVEs within 12 weeks of deployment
- Engineered environment rehydration framework in Python and Shell, cutting daily environment setup time from 3 hours to under 15 minutes
- Managed OS and security patching across 100+ RHEL/Amazon Linux EC2 instances using Qualys and AWS Patch Manager, maintaining 98% patch compliance
- Administered MongoDB Atlas, Redshift, and Redis clusters; implemented automated backup verification and failover testing
- Configured Nginx, F5, and ALB/ELB for high-availability deployments; designed blue-green and canary release strategies

Assistant System Engineer, Java Developer

Tata Consultancy Services

Jul 2019 – Oct 2020

Gandhinagar, Gujarat

- Developed and tested telecom features (port-in/port-out) using Java, Spring Boot, and MySQL; delivered production-ready code with full unit and integration test coverage
- Served as Security Deployment Lead (SDL) and Crisis Management Lead (CML), coordinating cross-team incident response and production hotfixes
- Established Graylog-based log aggregation pipeline, enabling faster root-cause analysis during production incidents

EDUCATION

Institute of Technology, Nirma University

M.Tech, Electronics – Embedded Systems Specialisation | **CGPA: 9.55/10** | **Gold Medalist**

Oct 2020 – May 2022

Ahmedabad, Gujarat

Vishwakarma Government Engineering College

B.E., Electronics and Communication | **CGPA: 7.91/10**

Jul 2015 – May 2019

Chandkheda, Gujarat

PROJECTS

Security Compliance & Vulnerability Scanning Automation | Wazuh, Trivy, WAF, Azure, Kubernetes, Bash

- Deployed Wazuh SIEM across Azure VM and Kubernetes environments; integrated Trivy for container image scanning; built automated compliance and vulnerability report generation pipeline
- Configured WAF and reverse proxy (Nginx, HAProxy, Traefik) for secure ingress; authored DR plan for cloud-hosted infrastructure

SSL Certificate Fleet Automation | Ansible, Sectigo, Cloudflare, AWS ACM, Bash

- Designed and deployed Ansible-based SSL automation across ~200 servers and 3 domains; implemented pre-flight validation, automated rollback on failure, and Slack-integrated deployment reporting
- Evaluated Sectigo, AWS ACM, and Let's Encrypt against enterprise compliance requirements; authored end-to-end deployment and rollback runbook adopted as the team standard

Enterprise Tooling Migration: CI/CD, Security & Monitoring | GitLab, Qualys, SumoLogic

- Led full-stack migration from Jenkins to GitLab CI/CD, Rapid7 to Qualys, and Datadog to SumoLogic across 40+ pipelines with zero production downtime

Automated Vulnerability Management & Remediation | Python, AWS SSM, CloudWatch, SNS, CIS

- Built end-to-end pipeline: Qualys scan to automated triage, SSM patch execution, SNS alerting, and SumoLogic compliance reporting; reduced manual remediation effort by 70%

CERTIFICATIONS

Sumo Logic Certified – Cloud Infrastructure Security

2025–2026

DevOps Professional Certificate – PagerDuty & LinkedIn

Oracle Autonomous Database Cloud Specialist – Oracle

GCP Big Data & ML Fundamentals – Google Cloud

Deep Learning Specialisation – deeplearning.ai (Coursera)
